

We're committed to understanding, managing, and minimising the environmental impact of our business operations, investments, products and value chain.

We recognise that making the right choices for the Environment is everyone's responsibility at Optus

We say 'Yes' to:

- Establishing clear roles and responsibilities, and set objectives and targets within the business and relevant stakeholders to monitor, measure and improve our environmental performance
- Identifying, assessing and managing all material aspects of our environmental impact
- Actively monitoring and complying with relevant environmental compliance and legislative requirements
- Continually improving our environmental performance and minimise impact through energy/water/waste management, pollution prevention and biodiversity protection (where relevant)
- Reducing our GHG emissions through use of technology, process improvements, energy optimisation, efficiency measures and supplier/investee engagement
- Adopting plans and measures throughout our operations and infrastructure to adapt and build resilience to the longer-term risks of climate change
- Promoting a culture in which all employees share our commitment in achieving our environmental objectives and targets
- Incorporating environmental considerations in our everyday business decisions, where relevant
- Monitoring and reporting on our environmental progress and performance in our annual sustainability report
- Engaging and collaborating with stakeholders in our value chain to review and improve their environmental performance including compliance

A handwritten signature in black ink, appearing to read "Andrew Buay". The signature is fluid and stylized, with a long horizontal stroke at the beginning.

Andrew Buay

Vice President, Group Sustainability
