

Is your firewall putting your organisation at risk?

4 compelling reasons to rethink your firewall strategy

The security landscape has shifted significantly with new threats emerging daily.

Is your firewall up to it?

23%

increase in cybercrimes in Australia in 2023 with 1 report every 6 minutes¹

What's keeping CISOs, Boards and IT managers up at night?

Risk

Security gaps and errors, with attackers using ever-smarter means to breach defences.

Compliance

Changing regulations and the legal, financial and reputational impact of non-compliance.

People

Threats never sleep, but how do you ensure 24x7 security amid a cyber skills shortage?

Cost

Staying up to date with threat prevention, from technology to training, is costly—and then there's the potential cost of a breach.

41%

of CEOs say they are underprepared for a cyber attack²

84%

see cybercrime as a threat to business growth²

The solution

What can a next-gen firewall do for you?

Protects today's flexible perimeter

Integrated approach includes prioritised alerts, unified policy, shared threat intelligence and stronger user and device authentication.

Defends against threats that never sleep

Automate threat response and mitigate known vulnerabilities.

Processes at much greater speeds to legacy firewalls

Handle ever-increasing volumes of traffic without creating bottlenecks.

Delivers superior visibility over encrypted traffic

Discover threats within encrypted traffic and detect malicious applications.

Drives efficiency at scale

Advanced clustering, high availability and multi-instance capabilities bring scalability, reliability and productivity across your teams and hybrid network environments.

Optus Managed Cisco Firewall

Benefit from a simple Opex solution that combines a next-gen firewall from global leader, Cisco, with expert support from Optus to secure your network and what matters most.

One simple Opex cost

With one vendor and one point of contact

Stay ahead of the curve

We work around the clock to keep your firewall infrastructure up to date

Freedom to focus on value-adding activities

Expert support, 24x7 monitoring and proactive optimisation from the Cisco-certified Optus team

An empowered hybrid workforce

Give them security to work productively anywhere, any time

Peace of mind

With standardised governance and change management procedures and certifications

The smarter way to secure your network against any threats – anywhere, any time.
