Ransomware Readiness Assessment

Could it happen to us?

Not only have we been coping with 'new ways of working' but locally in the Pacific region there have been some notable Ransomware cyber-attacks against local businesses, occurring more than once in a matter of months. Have you been asked how ready would you be to identify, protect, detect and respond to a Ransomware attack?

Trustwave's local Consulting and Professional Services team can help you assess your business's security posture and resilience in relation to common ransomware attack scenarios. This encompasses not only susceptibility to an initial compromise but the ability to detect attempted intrusions, respond and recover in a timely and effective manner.

This readiness assessment devised by Trustwave leverages the NIST Cyber Security Framework (CSF) and the Australian Cyber Security Centre's (ACSC) Essential Eight (E8) mitigation strategies and aims to:

- measure the maturity of your controls relevant to a Ransomware attack
- answer frequently asked questions like
    - What's the future of Ransomware
    - What are the common Ransomware attack vectors?
    - How can I prevent a Ransomware attack?
    - I have been compromised by a Ransomware attack, what should I do?

Specifically, in scope would be the following service activities:

Task	Rationale	Key activities
Assess Ransomware Readiness	• How effective are your controls for a Ransomware cyber attack? • Has your new way of working impacted your readiness? • Are there improvements you can make to be ready?	• Using a self-assessment questionnaire devised by Trustwave to measure the maturity of controls relevant to a Ransomware attack • Output is a summary report with your key weaknesses, strengths and our recommendations

Fixed Fee

We are proposing a fixed fee basis for this service across three service levels:

Copyright © 2020 Trustwave Holdings, Inc. All rights reserved.

Service Level	Cyber Advisory Service	Effort	Fee (ex. GST)
Bronze	Ransomware Readiness Assessment	**3 days**	**$ 5,400**
Silver	Ransomware Readiness Assessment + Security Colony subscription		**$ 9,000**
Gold	Ransomware Readiness Assessment + Security Colony Subscription + 12 month DFIR Retainer		**$ 22,000**

Security Colony

Our online collaboration portal **Security Colony** leverages sourced knowledge from a global community of organisations to help others. With the philosophy of 'solve once and share' this online resource, created in Australia, provides an extensive document library with real world client tested solutions and templates, a user forum, vendor risk assessment and breach monitoring alerting services.

Access expert advice and resources to reduce the time and cost of solving security problems.

Full details of the service subscriptions and inclusions are available at www.securitycolony.com.

Digital Forensics and Incident Response Retainer (DFIR)

Trustwave Spiderlabs experts can provide immediate response to an advanced threat breach or work with you to proactively improve your organisation IR readiness. The benefits of an IR retainer are the ability to

- supplement your team with renowned Trustwave Spirderlabs experts,
- respond quickly and in an organized manner,
- demonstrate due diligence to your board and shareholders.

A DFIR consulting retainer will ensure that Trustwave Spiderlabs experts are on standby as your first responders to a security breach. With DFIR experts stationed all around the globe, an expert first responder is only a phone call away, ready to determine the root cause of a breach, minimise its impact and preserve key evidence.
