### Service and plan availability

Optus Broadband services are not available in all areas or to all premises. The broadband service offered will be determined by what is available at your location. Optus Broadband services are only available at premises which can be physically connected to the Optus Network and where connection will be possible within three months based on rollout information provided by the nbn which is subject to change. There may be technical or commercial reasons that affect our ability to connect a service at your address. Until Optus successfully installs your service we cannot guarantee that the service can be installed at your address. To check your serviceability and find out what kind of Optus Broadband is available at your address visit [optus.com.au/serviceabilitycheck](https://optus.com.au/serviceabilitycheck)

### Equipment needs

You need a compatible broadband modem to use this service. The modem must be an Optus approved device. Customers on this plan will be provided with a gaming modem on a Device Payment Plan as part of your plan. The cost of the modem will be covered by Optus if you stay connected on an eligible Fixed Broadband plan for 36 months.

### Service limitations

This service may not be suitable if you have a serious illness or condition and require an uninterrupted service. Some equipment like back-to-base and medical alarms and other devices may not be compatible with the nbn and are not tested by us or supported on Optus nbn. You should contact your device supplier to find out if your device will work before connecting to the nbn.

This plan does not support a phone service, which means you won't be able to have a fixed line phone service that you can use to make or receive calls, including calls to emergency services. Optus Pause, Optus WiFi Secure, Optus WiFi Booster (and any other service or device that we may notify from time to time) are not supported on and will not work, with this plan.

### Fetch

You have the option at point of sale or at any time after to add up to three Fetch Mini or Fetch Mighty Set-top Boxes (STBs) to this plan on a month-to-month basis. Pricing for Fetch Mini and Fetch Mighty STBs on this plan are as follows:

- Fetch Mini (first) – \$5 per month (\$10 charge with a \$5 credit)
- Fetch Mini (each additional) – \$10 per month
- Fetch Mighty – \$15 per month

Fetch requires an active fixed Internet connection and download speed of at least 3.5Mbps, widescreen TV and external TV antenna connection. Video content quality can be affected by equipment, content, location and network congestion. Channels and content subject to change. Optus owns the STB and you must return it if your Fetch service is cancelled. If you cancel your Fixed Broadband service, you have the option to retain your Fetch service as a stand-alone service. However, you will forfeit any monthly Fetch credit Optus was providing as part of your plan.

The following fees will apply if an STB is not returned within 30 days of your Fetch service cancellation: \$150 for a Fetch Mini and \$250 for a Fetch Mighty STB.

For more information on Fetch, please see [optus.com.au/fetch](https://optus.com.au/fetch)

### Installation

Optus reserves the right to charge for non-standard installations. You must obtain permission from the owner of the property, if that's not you, to have Optus Broadband installed, and have someone over 18 years of age in attendance at the appointment. If you're in a new development and not already connected to the nbn, NBN Co may charge \$300 to connect your premises to the nbn. If applicable, we will bill that charge to you.

You may need two technicians (one Optus, one nbn) to install the service. If applicable, we will send you an Optus self-installation kit. Installation fees may apply if you request a technician installation where a self-install option is available. If you require assistance to connect, contact us at [yesopt.us/chat2us](https://yesopt.us/chat2us)

Optus is required by law to confirm your nbn service is working. We may not be able to confirm this if you do not use the modem that Optus supplies you. You'll need to tell Optus of any issues you have with your nbn service before we can rectify them. Billing will be activated once we confirm your nbn broadband service is operational.

**nbn FTTC and HFC:** If you are an Optus nbn FTTC or HFC customer and fail to plug in the equipment within the specified timeframes, NBN Co may cancel your order.

### **Other information**

#### **Changing the access method**

We may change the access method for your service for the remainder of your minimum term and move you to:

- A new plan that is reasonably comparable with your current plan; or
- An alternative plan, but only if we take reasonable steps to address any detrimental impact that the change may have on you that is not minor.

If we change your access method, you must provide all reasonable assistance to enable the change to be implemented, including access to your premises and equipment. If we are upgrading you to Optus nbn, by entering into this agreement you are giving your consent for NBN Co to install their equipment required to connect you to their network. Unless otherwise agreed with you, we will not charge you for installing or equipment we supply to you to use with the changed access method. Alternatively, we may ask you to change your access method during your minimum term even if the change may have a detrimental impact on you that is more than minor.

If you refuse our request, we may cancel the service by giving you at least 90 days' notice. If the service is cancelled, you will be liable for charges incurred up to cancellation, but you will not be liable for any cancellation fee or outstanding equipment charges. We will contact you to discuss the details of any changes we plan to make to your access method prior to making the change.
